

McCartney Systems, LLC

SECURE SYSTEMS. PRACTICAL RESULTS.

UEI K3LSHZ9JFCQ1
CAGE PENDING

Government technology, Cybersecurity, Microsoft cloud, and purpose-built software.

McCartney Systems delivers security-first technology for government agencies and growing organizations. We combine public-sector operational experience with practical engineering, responsive support, and U.S.-based software development.

CORE CAPABILITIES

Cybersecurity: Security assessments; vulnerability management; attack-path analysis; identity and access management; incident readiness; NIST 800-171 and CIS alignment.

Microsoft & Infrastructure: Microsoft 365 and GCC licensing; tenant migration; Entra ID; Intune; Teams; SharePoint; Windows Server; virtualization; network engineering; managed support.

Software Engineering: Secure custom applications; workflow automation; API and systems integration; database design; reporting solutions.

Government Technology: Public-sector IT consulting; election reporting technology; documentation; operational planning; U.S.-based development and support.

PROPRIETARY PLATFORMS

Sariel - Cybersecurity intelligence platform for graph-based attack-path validation and infrastructure risk analysis.

Atlas Platform - Infrastructure and security software family, including AtlasVM virtualization, AtlasDMARC email-authentication monitoring, and AtlasEWF pre-connect endpoint DNS and web filtering.

AtlasEWF - Pre-connect endpoint DNS and web filtering platform with centralized policy management, Windows Firewall/WFP enforcement, forensic-quality logging, offline operation, and SIEM integration.

AtlasVM - Enterprise virtualization platform providing secure host management, virtual machine orchestration, storage integration, high availability, and infrastructure management.

AtlasDMARC - Email authentication, DMARC reporting, SPF/DKIM validation, and domain protection platform for Microsoft 365 and enterprise environments.

FieldWarden - Business operations and workflow software family, beginning with field-service management and expandable to service desk, asset, and ticketing systems.

Elections Platform

Secure public election-night reporting and administrative management for state and local government.

Web Design and Hosting - Custom web design with hosting options for agencies or corporations. Various integrations supported and custom module development capable.

DIFFERENTIATORS

- Government-focused operational experience
- Security-first engineering approach
- Direct access to technical leadership
- Microsoft cloud and GCC specialization
- Purpose-built products, not generic reselling
- Local accountability with nationwide service

COMPANY DATA

Legal Name: McCartney Systems, LLC

Business Type: Small Business; Veteran-Owned

Location: Plattsmouth, Nebraska

Service Area: United States

SAM Status: Registration in Process

NAICS

541512 Computer Systems Design

541511 Custom Programming

541519 Other Computer Services

513210 Software Publishers

518210 Hosting and Related Services
